Refunds minus \$50 are given if cancellation requests are received 14 days before the course date. No refunds are granted after that date unless the vacancy can be filled. If the course is cancelled a full refund will be given.

A 4-day intensive tutorial in the diagnostic and therapeutic application of **functional (indirect) techniques** as applied to the cranial, cervical spine and lumber pelvis area of the canine/feline.

These techniques use the principles of motion testing, inherent tissue motion and motion in relation to the restrictive barrier. Lecture, demonstration and hands-on applied practice of the techniques for the various regions will be given. Emphasis will be placed on palpatory skills.

This tutorial addresses evaluation of:

- Vascular motility and vitality through the full canine body
- Vascular manipulation in an osteopathic model
- Understanding and manipulating the Portal system, the spine and extremities
- Gait analysis with the understanding of the vascular dynamics
- Exercise and home programs
- Class available for Veterinarians, Vet. Technicians, Physical Therapist and other health care providers

Approved by Oregon and Washington Veterinary Licensing Board for CEU's.
